MAJOR SKILLS

Angular
Spring Boot
Flutter / Dart
Git / GitHub
Docker

AWS (EC2)
Linux Server
Administration

CERTIFICATIONS

[Computer System
Servicing NC II](#)

ORGANIZATION & LEADERSHIP

Google Developers
Group (GDG) @ PUP
CyberSec – Red Team
2nd Lieutenant - 2024

OTHER SKILLS

AI & Machine
Learning

n8n Automation

Shell Scripting
(Bash & PowerShell)

Computer Systems
Servicing

Terminal Agents

PROFESSIONAL EXPERIENCE

Software Developer Intern

Feb 16, 2026 – June 5, 2026

Xtreme Offshore Outsourcing | ARKRAY

As part of his ongoing professional development in industry-grade software engineering, James contributed to the development of robust, scalable applications. During his time at the company, he focused on building modern user interfaces and reliable backend systems, bridging the gap between theoretical academic knowledge and practical tech-stack deployments to deliver production-ready software solutions.

PROJECTS

iBudget – Personal Finance Budgeting Application

Developer, Tester, DevOps

Developed a budgeting web application using **Angular** for the frontend and **Spring Boot** for the backend to help users track expenses

- Engineered a 3-Tier architecture using **Angular** and **Spring Boot**, implementing **CI/CD pipelines** via GitHub Actions for automated testing and deployment.
- Integrated an AI-agent chatbot n8n microservice to assist users with financial queries and budget planning whilst securing API endpoints for safe data transaction.
- Implemented CI/CD automation using GitHub Actions.

PawSight – Pet Behavior Android Utility App

Mobile Developer

Developed a specialized Android application focused on pet behavior and owner education.

- Implemented **offline access** capabilities and a robust **search/filter system** to ensure users can access information without an active internet connection.
- Integrated an AI-powered chatbot assistants for pet owners to talk to about their pets.
- Designed a minimalist UI using **Flutter's ForUI** library for a seamless user experience.

Cloud Infrastructure & Linux Automation

DevOps and System Administrator

Deployed and managed self-hosted infrastructure to practice cloud operations and system hardening.

- Deployed a self-hosted **n8n** automation instance on **AWS EC2**, managing security groups, firewalls, and server uptime.
- Configured secure remote server access via **SSH** and performed system hardening techniques to secure the Linux environment
- Optimized local development workflows by managing version-controlled dotfiles and architecting highly efficient terminal environments utilizing modern, open-source CLI/TUI utilities.

EDUCATIONAL BACKGROUND

Diploma in Information Technology

Polytechnic University of the Philippines Taguig Campus 2023 – Present

Focus: Backend Development and DevOps

Computer System Servicing Strand

Western Bicutan National High School 2021 - 2023
